

Charge & Connect

Battery Connect

Your digital battery management

Charging of traction batteries

Battery Connect

Experience the future of battery management – digital, transparent and efficient.

With Battery Connect you are in control over your battery fleet – from transparent handling insights to comprehensive monitoring.

Besides a comprehensive overview of the condition of your batteries, Battery Connect also enables an efficient battery management. From reassigning TagIDs to simple master data maintenance, you are always in control.

Say goodbye to guessing and hello to an efficient way of managing your batteries.

Transparency that excites

Identify events and treatments to clear insight into equipment handling. Whether its duration of use, current status or past incidents – **always have all relevant battery information at a glance.**

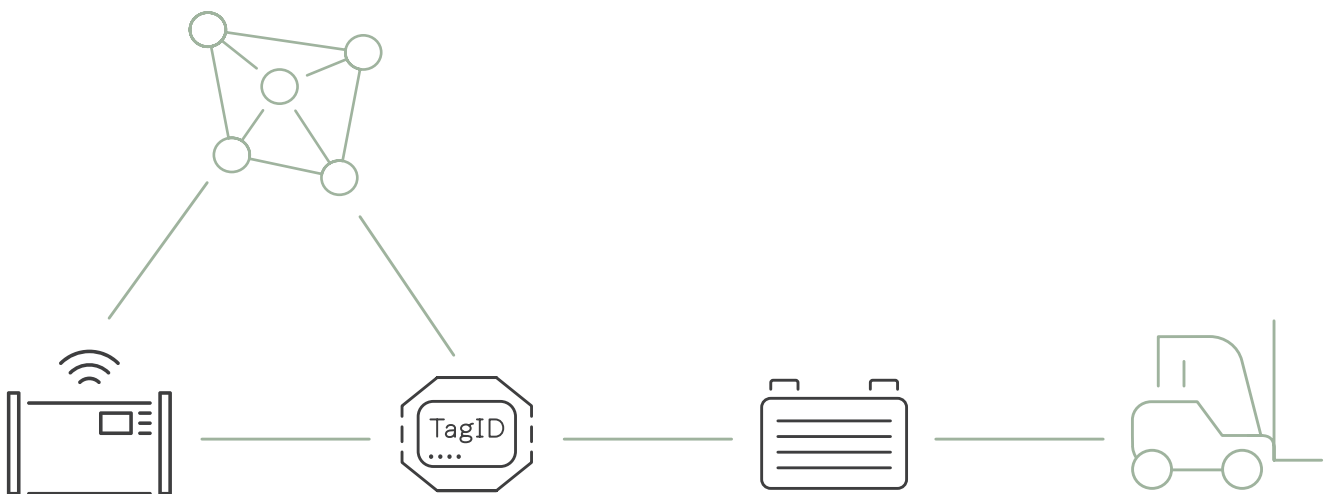

Real-time Inventory Overview

Battery Connect allows you to check the use of your batteries at any time. Identify problematic behaviour during charging fast to ensure continuous and save operations.

Optimized Main- tenance and Support

Fast fault detection during charging to quickly take appropriate action and minimise unplanned outages.

Maintenance planning made easy to keep track of important data.

Reporting Function

With the Battery Connect Report you have all the relevant battery performance KPIs at a glance. The reports can be easily accessed, generated and shared.

Perfect Charging

For a future-proof,
CO2 neutral
intralogistics

We support you in making your company fit for the future: Be it by switching to electrically powered industrial trucks, using one of the most efficient chargers on the market or intelligently combining battery charging technology and photovoltaics.

All with one purpose:

Shaping the future of intralogistics sustainably together.

We are your contact for...

- Reduced energy costs and reduced carbon footprint
- Reliable and safe charging processes
- Maximum availability of your industrial trucks
- Increase your competitiveness
