

REPOSITIONING OF TRANSSTEEL

/ The repositioning of TransSteel brings about several advantages for you as a dealer.

FEWER PRODUCT VARIANTS

The reduction in the number of product variants has the following benefits:

- / Fewer item numbers
- / Easier configuration
- / Simplified stock-keeping
- / Rapid availability for customers

POWER SOURCE

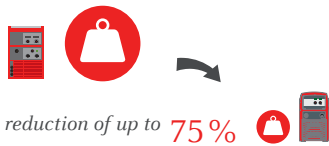

WIREFEEDER

INVERTER TECHNOLOGY

is now state-of-the-art. Step controlled power sources are a thing of the past.

Inverter power sources also impress with their significantly lower weight.

Transport costs are therefore reduced considerably.

NEW PRICING STRUCTURE

As of 2017, there will be greater price reductions for TransSteel systems depending on the model

TRIED-AND-TESTED QUALITY PRODUCT

The TransSteel is a quality product. Servicing and repair work is hardly ever required.

COMPARISON*

VARIOSYNERGIC 5000 | **TRANSSTEEL 5000**

€ 4,396.00  € 5,810.00

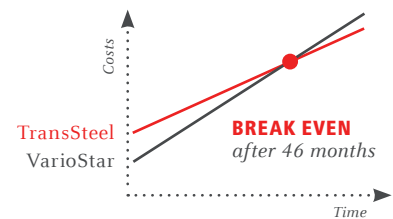

PURCHASING COSTS

18.61 kWh  16.05 kWh

ENERGY CONSUMPTION

up to **€ 369.00**
in energy savings per year

Assumption:
[3 hrs per day, 240 working days per year, €0.20 per kWh]

*Power consumption was measured at the same operating point (420 A)
