

SHIFTING THE LIMITS

FRONIUS WARRANTY EXTENSIONS

Manufacturer's Warranty

In Canada, all Fronius string inverters come with a 10-year manufacturer's warranty that covers parts, labour and ground transportation.

Installers can request that the manufacturer's warranty begins on the date of installation. Fronius requires a letter of installation to be submitted. You can find a template and instructions at www.fronius.ca -> Solar Energy -> Products -> Warranty.

An extended warranty must be purchased within 30 months of product delivery from Fronius Canada. Once this deadline has passed, warranty extensions cannot be purchased.

Fronius offers two types of 5 or 10-year warranty extensions: the standard **Fronius Warranty Extension** and the more comprehensive **Fronius Warranty Extension Plus**.

Terms and Conditions

Standard terms and conditions apply for the manufacturer's warranty and all types of warranty extensions. Fronius' terms and conditions can be [viewed on our website](#).

Fronius Warranty Extension

This cost-effective 5 or 10 years of additional warranty coverage includes replacement parts. Labour to repair the inverter, and transportation of the inverter or parts is not included.

Fronius Warranty Extension Plus

This additional 5 or 10 years of warranty coverage includes replacement parts, a service reimbursement to cover the labour to repair the inverter and ground transportation of the inverter and parts to the service depot or customer.
